PROFESSIONAL SUMMARY:

Agentic AI & Full-Stack Engineering student with hands-on experience in designing and developing AI-powered applications, autonomous multi-agent systems, and scalable full-stack web platforms. Skilled in building intelligent workflows using Large Language Models (LLMs), AI agents, RAG pipelines, automation systems, and modern AI frameworks integrated with React.js, Next.js, Python, Flask, REST APIs, MongoDB, and cloud-based services. Experienced in developing end-to-end solutions that combine frontend engineering, backend architectures, AI orchestration, real-time analytics, NLP integrations, and workflow automation. Strong understanding of software engineering principles, scalable system design, API integration, authentication, database management, and responsive user experiences. Demonstrated problem-solving abilities through competitive programming and real-world AI/full-stack projects focused on enterprise-grade automation, intelligent decision-making systems, and next-generation Agentic AI applications.

EDUCATION

KIT-Kalaigarkarananidhi Institute of Technology	2023 – 2027
B.E CSE (AI&ML) , Pre-Final year	Current GPA:8.42/CGPA: 8.04
Coursework: Full-Stack AI ,OOPS,DSA,Machine learning,Deep learning,IOT,LLM Applications	10th -ALL PASS 2020 – 2021
EXPERIENCE	12th - 73% 2022 – 2023

Machine Learning Training, EtherInfotech – India (offline)	2024
Completed structured Machine Learning training covering supervised and unsupervised algorithms, with hands-on projects using Python, NumPy, Pandas, Scikit-learn, and Matplotlib for regression and classification models.	
Full Stack Development Training, LearnLogicify – India (offline)	2025
Completed hands-on training in HTML, CSS, JavaScript, and backend fundamentals, building responsive web pages and mini applications with modern UI/UX practices, APIs, database concepts, and deployment workflows.	

PROJECTS

1.AI-ZYRA Personal Learning Agent AGENTIC AI Next.js, React.js, Express,Tailwind, LocalStorage, AI APIs DEPLOYED
- AI-Powered Learning Platform built with Next.js, Tailwind CSS, FastAPI, and Groq LLMs for a seamless learning experience. - Multi-Agent AI System featuring specialized agents for tutoring, coding practice, quiz generation, and roadmap planning. - LeetCode Coach Agent analyzes code, evaluates time/space complexity, and provides strategic hints for interview preparation. - Adaptive Tutor Agent delivers personalized explanations, practical examples, and knowledge-check questions based on user proficiency. - Comprehensive Study Ecosystem offering customized roadmaps, dynamic quizzes, study recommendations, and note summarization in one platform.
2.Glint - A Social platform for Freelancers FULL STACK React · Typescript · Javascript · Vite · Context API · Tailwind CSS · Authentication DEPLOYED
- Built a freelancer-focused social platform where users can create profiles, share their work, and connect with clients, with separate login flows for freelancers and recruiters. - Implemented basic authentication and role-based routing to show different dashboards and features depending on whether the user logs in as a freelancer or a client. Structured the project using separate components, context for state management, and service files to handle data flow clearly and prepare the application for future backend integration. - Designed a clean and responsive interface using Tailwind CSS, added simple animations, and implemented persistent login sessions to improve overall usability and user experience.
3.SoloBoss AI AI-Powered Automation Suite with Job searching and proposal React.js, Vite, JavaScript, CSS3, Lucide React, React Router DOM, Rest API Deployed
-Built an AI-powered freelance automation platform that discovers high-paying remote jobs, generates personalized proposals, and streamlines client outreach using autonomous AI agents. -Designed a futuristic dashboard with dynamic job scraping simulation, AI proposal generation, and real-time workflow monitoring for freelancers and creators. -Implemented responsive UI/UX with scalable component architecture and API-driven AI interactions for intelligent automation workflows.
4.OTHER mini-projects:
KnockSense-Smart Knock Alert System ESP8266,IoT,Sensors,C++
AUTOFIGURE-AI website that helps to generate diagrams from the text and images for students. DEPLOYED
Competitive programming tracker An system that automatically tracks user statistics in global platforms DEPLOYED

TECHNICAL SKILLS

Languages & Frameworks:Python, Java, JavaScript, React.js, Next.js, Flask, REST APIs, SQL, Tailwind CSS, Vite
AI & LLM:Machine Learning, Prompt Engineering, NLP APIs, LLM-integrated Applications, AI-assisted Workflows, AI Automation Systems,GitHub, Copilot, Claude AI
Frontend: React.js, Next.js, Responsive UI/UX, Context API, Component-based Architecture
Backend & APIs : Flask, REST API Development, Authentication Workflows, API Integration, JSON Data Handling, Backend Integration
Databases: MongoDB, MongoDB Atlas, Database Fundamentals, Supabase
Cloud & DevOps:Git, GitHub, CI/CD Fundamentals, Cloud Concepts
Core CS:DSA, OOPS, DBMS, Problem Solving, System Design Basics
Tools: Git, GitHub, VS Code, Arduino, Adobe tools

CERTIFICATIONS & COURSES

Juniper (Mist AI) – Virtual training program
Infosys – OOPS fundamentals certification
NPTEL – Large Language module introduction
NPTEL – Design Thinking CISCO – Python Essential, cyber security

COMPETITIVE PROGRAMMING

Leetcode : Max rating - **1485** | Top **67.4%** globally | Badges : **3**
Codeforces : Max rating - 1395 | | Solved problems: 130+
Codechef : Max rating - **1545** | Position : 2 Star |diamond badge,gold badge in daily streak and contest

ACHIEVEMENTS

- Presented a technical project at BITS Pilani, Hyderabad Campus.
- Actively participated in 100+ coding contests across multiple competitive programming platforms, strengthening problem-solving and algorithmic skills.
- Secured 3rd place in a FULL STACK Technical Event conducted at Dr. NGP College of Engineering.
- Participated in ICCSS 2025 Conference held at Rathinam College of Engineering, and presented a research paper. "IOT-enabled Breath Aerosol Analyser".

Strengths: Strong fundamentals, honest problem-solving and Developing approach, quick learner with hands-on project experience.
